

Tannvi Sanekar

AI Engineer (Generative AI & Analytics)

Nagpur, Maharashtra, India

sanekartannvi@gmail.com | +91-8855871061 | LinkedIn

Professional Summary

AI Engineer with experience in Data Science, Machine Learning, and Generative AI, specializing in NLP, LLMs, Retrieval-Augmented Generation (RAG), and AI solution architecture. Proven expertise in designing and deploying enterprise-scale AI solutions using Azure OpenAI, vector databases, and end-to-end AI pipelines. Strong collaborator with stakeholders, delivering secure, scalable, and responsible AI systems aligned with business objectives.

Core Skills

Generative AI & NLP: LLMs (GPT-4/GPT-4o), Azure OpenAI, Hugging Face, LangChain, LangGraph, Prompt Engineering, RAG, Semantic & Hybrid Search

Machine Learning: Supervised & Unsupervised Learning, Deep Learning, Data Science, Optimization Techniques

Data Engineering: ETL Pipelines, Feature Engineering, NoSQL, Vector Databases, FAISS

Cloud & MLOps: Azure, Git, CI/CD (Foundational), API Integration

Visualization & Analytics: Power BI, Exploratory Data Analysis

Programming: Python, JavaScript, HTML, CSS

Professional Experience

AI Engineer

Sept 2024 – Present

NTT DATA

- Designed and implemented enterprise-grade AI and Generative AI solutions across lending, HR, analytics, and legal domains.
- Supported AI/ML POCs by managing Git repositories, documentation, and stakeholder coordination.
- Built Hanover Real-Time Jobs Monitoring Dashboard exposing SLA, latency, throughput, and error metrics.
- Developed an Agentic Auto Lending Dashboard for General Motors automating document ingestion, vendor scoring, and risk assessment with audit trails.
- Modernized legacy systems by converting complex COBOL logic into scalable Python workflows (TPA Conversion).
- Designed AI-powered Invoice Validation system using Azure Document Intelligence and GPT-4o.
- Architected DocFlow (State of Florida), an AI-enabled document management platform using Azure OpenAI and Power Automate.
- Developed Peticraft, an agent-based legal petition generator using LangGraph, FastAPI, React, and GPT-4o.
- Developed HR chatbot (HelpR) using Retrieval-Augmented Generation (RAG) and advanced LLMs.
- Built backend pipelines using LangChain, Streamlit, Hugging Face Mistral models, and FAISS.
- Implemented hybrid retrieval combining structured and semantic search.
- Optimized query latency and enhanced user experience.

Generative AI Intern *Jul 2024 – Aug 2024*
Skillible (AICTE)

- Applied prompt engineering, bias mitigation, and evaluation techniques.
- Built LLM-based system for automated research paper insights extraction.

Web Developer Intern *Apr 2023 – Jun 2023*
Capgemini

- Designed secure OAuth-based authentication interfaces.
- Improved UI/UX and frontend performance in Agile environments.

Key Projects

Enterprise HR Chatbot – HelpR (RAG-Based)

- Built an LLM-powered HR chatbot to handle policy queries, document retrieval, and employee assistance.
- Implemented Retrieval-Augmented Generation using LangChain, FAISS, and Hugging Face models.
- Improved response relevance and reduced query resolution time using hybrid retrieval techniques.

AI-Powered Invoice Validation System – Mitsui (SAP)

- Developed an automated invoice validation system using Azure Document Intelligence and GPT-4o.
- Extracted, validated, and cross-checked invoice data against internal records.
- Reduced manual invoice processing effort and improved financial accuracy.

Agentic Legal Petition Generator – Peticraft

- Designed an agent-based system to generate court-ready legal petitions for civil and criminal cases.
- Leveraged Azure OpenAI GPT-4o, LangGraph, FastAPI, and React.
- Enabled versioning, validation, and export to PDF/DOCX formats.

Education

Bachelor of Engineering – Computer Engineering
Savitribai Phule Pune University *2020 – 2024*
CGPA: **9.5**

Shirinbai Neterwala School, CBSE (12th) *2020*
Percentage: **91.4%**

Shirinbai Neterwala School, CBSE (10th) *2018*
Percentage: **91.2%**

Certifications

Azure AI-102 | Azure DP-100 | Azure AI Fundamentals | Azure Fundamentals | Generative AI Certification (Levels 1–3) | Hugging Face Agent Course

Additional Information

Languages: English, Hindi, Marathi
Strong focus on Responsible AI, fairness, transparency, and accountability.
