PROFESSIONAL SUMMARY

.NET Full Stack Developer with 3+ years of enterprise application development in the healthcare domain, specialising in C#, ASP.NET/.NET Core, ASP.NET Web API, REST APIs, SQL Server and Angular. Proven track record applying MVC architecture, SOLID principles and enterprise design patterns to deliver production features. Experienced in Agile SDLC, troubleshooting, code reviews and systems analysis.

EXPERIENCE

FinThrive

Associate Software Engineer

Gurgaon, India

June 2023 – Present

- Built scalable enterprise applications using Angular (frontend) and C#/ASP.NET/.NET Core, SQL Server and ASP.NET Web APIs, applying MVC architecture, SOLID principles and enterprise design patterns.
- Optimized SQL queries and stored procedures for enterprise reporting, improving performance across high-volume workflows.
- Authored and expanded unit test coverage using GitHub Copilot-assisted test generation, reducing regression defects across release cycles and increasing sprint confidence.
- Participated in code reviews, applying OOP, SOLID principles, dependency injection, and clean architecture to improve code quality and reduce production defects.
- Collaborated with team members to promote coding standards, OOP principles, dependency injection, and clean architecture practices, improving code quality and maintainability.
- Provided technical support by diagnosing and resolving production incidents while ensuring SLA compliance.
- Designed reusable libraries, shared services and common components to improve maintainability, scalability and code reuse across enterprise applications.
- Developed and maintained ASP.NET Web APIs and REST APIs supporting enterprise healthcare workflows.
- Participated in the complete SDLC, including development, testing, deployment, and production support.

TECHNICAL SKILLS

Languages	C#, TypeScript, jQuery, JavaScript, SQL, HTML5, CSS3
Frameworks	ASP.NET, .NET Core, Angular, NgRx
APIs & Architecture	ASP.NET Web API, REST APIs, Web Services, MVC Architecture, Microservices, Dependency Injection, SOLID Principles, Enterprise Design Patterns, OOP
Database	SQL Server, Stored Procedures, Query Optimisation, Relational Databases, Azure Cosmos DB
Cloud & DevOps	Microsoft Azure, Git, GitHub, CI/CD Pipelines, GitHub Actions
Tools	GitHub Copilot, Jira, Visual Studio
Process	Agile, Scrum, Unit Testing, Code Reviews, Technical Documentation, SDLC
Domain	Healthcare Technology, Revenue Cycle Management, SLA Compliance

PROJECTS

Blockchain-Based Voting System

B.Tech Final Year Project

- Designed and implemented a blockchain-based voting platform using distributed ledger principles and cryptographic hashing to ensure tamper-resistant, publicly verifiable vote records with double-vote prevention.
- Authored and presented a research paper on the system architecture and implementation at an academic conference.

EDUCATION

Amity University Online

Master of Business Administration (MBA), Information Technology Management

Expected 2027

Sharda University

Bachelor of Technology (B.Tech), Computer Science Engineering

2019 – 2023

CERTIFICATIONS

Oracle Certified Associate Java SE 11 (In Progress) · Microsoft Azure AI Engineer Associate (AI-102) · Database Program-ming with SQL · Cloud Computing Fundamentals 101 · Database Foundations
